

Region Seven: Southern Illinois

Landfills Transfer Stations Compost Facilities

Trash Could Ruin Us All!

Dirty roads and messy streets,
How will we survive?
Air is dirty,
Waters black,
The trees are going to cry.

The air is filled with gas and oil,
There are tires in the streets,
And leaks in tanks go washing down,
Quickly through the streams.

Birds are dying,
Fish are too.
It's time to clean up,
So how about you?

Does it seem like a lot?
What can you do?
Recycle clean up,
And there's more you can do.

I don't have time to name them all,
But if nobody helps,
TRASH COULD RUIN US ALL!

Kelsey Swindle - Lisle Junior High School, Lisle

2003-2004 Winner of Illinois EPA's School Poetry, Prose and Poster Contest for 5th and 6th graders

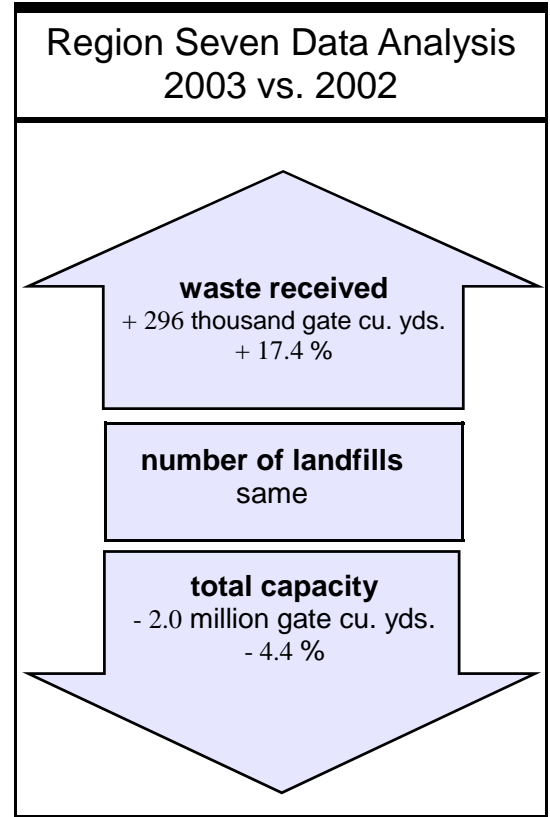

REGION SEVEN'S FIVE ACTIVE LANDFILLS ACCEPTED almost 2.0 million gate cubic yards of waste during 2003. This volume was up 17.4 percent, or about 296 thousand gate cubic yards more than 2002's total.

In terms of capacity share statewide, Region Seven had the least: 6.5 percent of 2003's total volume. Region Three (Peoria/Quad Cities) had the most at 26.7 percent.

Southern Illinois Regional Landfill, near DeSoto, stayed at 11th place in waste disposal ranking in 2003, and accounted for nearly 59.8 percent of the waste landfilled in the region during the year.

Of the 1.2 million gate cubic yards of waste received by Southern Illinois Regional Landfill in 2003, 452 thousand gate cubic yards, or 38 percent, came from Kentucky and Missouri. In comparison, Lawrence County Regional Landfill, Sumner, accepted about 11 percent of its waste in 2003 from Indiana. West End Disposal Facility, accepted four percent from Kentucky.

The regional percentage of imported waste is 23.9 percent, considerably less than Region Six (Metropolitan East St. Louis), where out-of-state waste comprised 49.1 percent of total waste landfilled. The state-wide average of imported waste is 11 percent.

Landfills and Transfer Stations: Active, Inactive & Under Development in 2003

Region Seven Solid Waste Statistics

Counties	22
Area (square miles)	8,421
Population (est.)	434,527

Landfill life expectancy	
Years remaining	22 *

Landfills	
Active in 2003	5
Open past 2003	5
New in 2002	1
(plus one in 2004)	

Transfer Stations	
Active in 2003	3
Re-opened in 2001	1
Under Dvpt. in 2003	1

Compost facilities	
Active in 2003	1

* Total remaining capacity (from table below) divided by total waste accepted. Tells how long the region may be served by local landfills at current disposal rates, barring capacity adjustments, until capacity is depleted.

Half of capacity available is at West End Disposal Facility

As of Jan. 1, 2004, the Region's landfills reported a total capacity of 43.8 million gate cubic yards. The region and State's newest landfill, West End Disposal Facility, contains 52.4 percent of the capacity available in the region for waste disposal. That capacity helps elevate it to number six in the State.

In addition, next year more capacity will be reported at Southern Illinois Regional Landfill because of the proposed expansion of the south unit approved on July 2, 2004.

New landfills proposed in Perry and Saline Counties

The need for more capacity in Region Seven is appeased for the time being by the opening of two landfills: West End Disposal Facility, Galatia, in October 2002 and Perry Ridge Landfill, DuQuoin on March 8, 2004.

West End Disposal Facility expects to operate for 38 years. The landfill has an initial design capacity of 14.5 million airspace cubic yards. The site was permitted to operate on Oct. 24, 2002.

Perry Ridge Landfill expects to operate for 20 years. This landfill has an initial design capacity of 14.9 million airspace cubic yards. It received its operating permit on Dec. 12, 2003, but did not open until Spring 2004 (March 8).

An expansion was denied as of June 30, 2004

Saline County Landfill has been inactive because its permit to expand vertically and horizontally has been denied by Illinois EPA. The Illinois Pollution Control Board is handling the appeal.

Landfills: Waste Accepted 2003; Remaining Capacities Jan. 1, 2004

	Municipality	County	Wastes		Capacity		Disp. Area Acres	Close Year
			Cu. Yds.	Rank ¹	Cu. Yds.	Rank ²

Totals			1,990,192		43,791,000			

* Three landfills accepted out-of-state waste from Indiana, Kentucky and Missouri during 2003, totaling 475,528 gate cubic yards, or 23.9% of the region's total.

¹ Standing among 50 landfills that accepted waste during 2003.

² Standing among 49 landfills that reported capacity as of Jan. 1, 2004.

³ Operation of Cell 3 approved 11-26-02.

⁴ Permit to develop granted 9-28-01; to operate on 12-12-03. Opened for business 3-8-04.

⁵ Permit to operate Phase II side-slope cell approved as of 11-27-02; south unit expansion approved on 7-2-04.

⁶ Permit to develop granted 5-16-01; site opened 10-24-02.

UD = Under Development during all of 2003.

County agencies inspect facilities; investigate dumping

The Illinois EPA has delegated inspection authority to health departments in Jackson, Perry and Wayne counties. A multiple county delegated agent is Ambraw Valley Solid Waste Agency inspecting Lawrence County Regional Landfill and several closed sites in Crawford, Lawrence and Richland counties.

Delegation agreements authorize these agencies to conduct many of the duties that would otherwise have to be performed by the Illinois EPA field office: investigating and enforcing suspected violations of land pollution laws and reports of open dumping, and inspecting landfills, transfer stations and compost facilities permitted through the Agency's Bureau of Land. (Inspections also include industrial landfills, or monofills, and landfills that closed prior to 2001; none of which are included in this report.)

Transfer station's activity is underrepresented

In 2003, even though active transfer stations number only three, they nevertheless play an important role in such a large region having only five landfills. During 2003, two of the three facilities voluntarily reported handling 60,256 tons of municipal waste, an amount equal to about 10 percent of waste landfilled in Region Seven that year. But since reporting is voluntary, the actual amount of waste received at one active facility in 2003 is unknown.

Transfer Stations: Waste Handled 2003				
	Municipality	County	Tons	
UD	Ashalex Recycling C & D	Marion	Williamson	0
	Herrin Solid Waste ¹	Herrin	Williamson	0
	Marion Transfer Station	Marion	Williamson	32,928
	Mt. Vernon TS	Mt. Vernon	Jefferson	27,328
	Total			60,256

¹ Active, but waste receipts unknown.
UD = Under Development

New Earth: Region Seven's only compost site

The Region's one compost facility reported handling less than 1,557 tons of landscape waste, which is negligible compared to the municipal waste that entered Region Seven's landfills in 2003, and up 47 percent from the amount accepted the year before.

Ashalex Recycling Compost Site is under development as of April 4, 2002, and has not yet been authorized to open.

Compost Facility: Waste Accepted 2003				
	Municipality	County	Tons	
	New Earth	Carterville	Williamson	1,557
	Total			1,557

Questions and Complaints

Illinois EPA Region Seven field office personnel investigate reports of suspected illegal waste disposal, and inspect the region's landfills, transfer stations and compost facilities, except in **Crawford, Jackson, Perry, Lawrence, Richland and Wayne counties**, where joint responsibility has been delegated to local authorities.

Questions or complaints concerning pollution control facilities, open dumping or other incidents should be directed to the office having jurisdiction over the site:

Municipal Waste Management Plans

The Solid Waste Planning and Recycling Act requires all Illinois counties and the city of Chicago to develop, adopt and implement 20-year municipal waste management plans.

Plans include programs and recommendations to achieve solid waste management goals, which typically include waste reduction, recycling, incineration and landfilling as program options.

The law requires each plan to include a program designed to recycle 15 percent of municipal waste by the end of the third year of the program and 25 percent of municipal waste by the end of the fifth year, depending upon the availability of markets.

Every five years, each plan must identify changes in planning areas, evaluate progress in plan implementation and, if necessary, revise plan recommendations and goals. The county also has the option of updating its solid waste generation rate. The plan is then submitted to the Illinois EPA for review and comment.

Five year plan updates have been adopted by Clay, Edwards, Franklin, Gallatin, Hardin, Jackson, Jefferson, Lawrence, Massac, Perry, Pope, Richland, Saline, Union, Wabash, Wayne, and White Counties.

No ten year plan updates have been completed.

Questions concerning these plans and their availability should be directed to the appropriate local administrators listed in Appendix K of this report.

Details concerning Region Seven landfills, transfer stations and compost facilities follow on pages R7.5 through R7.16.

Average recycling rate is 14.5 percent

The Agency does not regulate recycling nor does it possess any mechanism to compel county recycling coordinators to respond to Agency surveys seeking current recycling rates, or otherwise attest to the viability of local recycling programs.

Recycling rates in Southern Illinois were the lowest of all seven regions, probably because of not being close enough to markets for recyclable materials. Rates ranged from 2.8 to a high of 3.5 percent, yielding a multi-year average of 14.5 percent.

Eight of 22 counties in the region offered data for 2003. ♦

Municipal Waste Recycled

County	Estimated Population	Waste Generated		Waste Recycled
