

Landfills Transfer Stations Compost Facilities

"Pitch in. Put Waste in its Place: Are You as Smart as They Are?" by Emily Heinz, student, Hampshire Middle School, Hampshire (Kane County). Winner of Illinois EPA's School Poetry, Prose and Poster Contest for 5th and 6th graders.

LANDFILLS IN REGION THREE ACCOUNTED FOR 20.6 PERCENT OF the more than 980.4 million gate cubic yards of disposal capacity remaining statewide on Jan. 1, 2006, leading the State in capacity share.

The State's largest landfill, Spoon Ridge Landfill, Fairview, housed 64 percent of the capacity in the region, translating to 13.6 percent of the capacity in the State. It ranked last in terms of wastes received in 2005, yet first in the State in terms of remaining landfill capacity since Jan. 1, 1997.

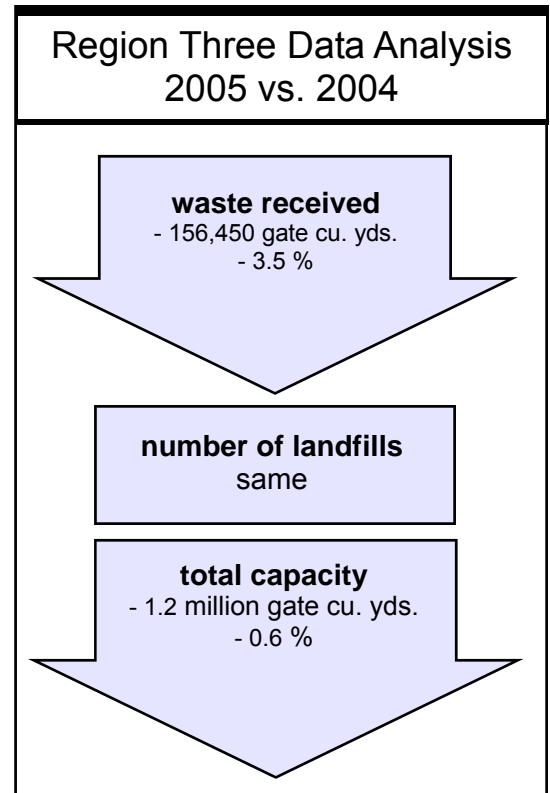

Total capacity in the region declined 1.2 percent from the previous year. The re-opening of Indian Creek Landfill No. 2 as well as horizontal and vertical expansions at Envirofil of Illinois in 2004 and several new areas or cells that were permitted to open at three landfills during 2005 helped buffer more extreme changes in capacity.

Waste disposal decreased 3.5 percent

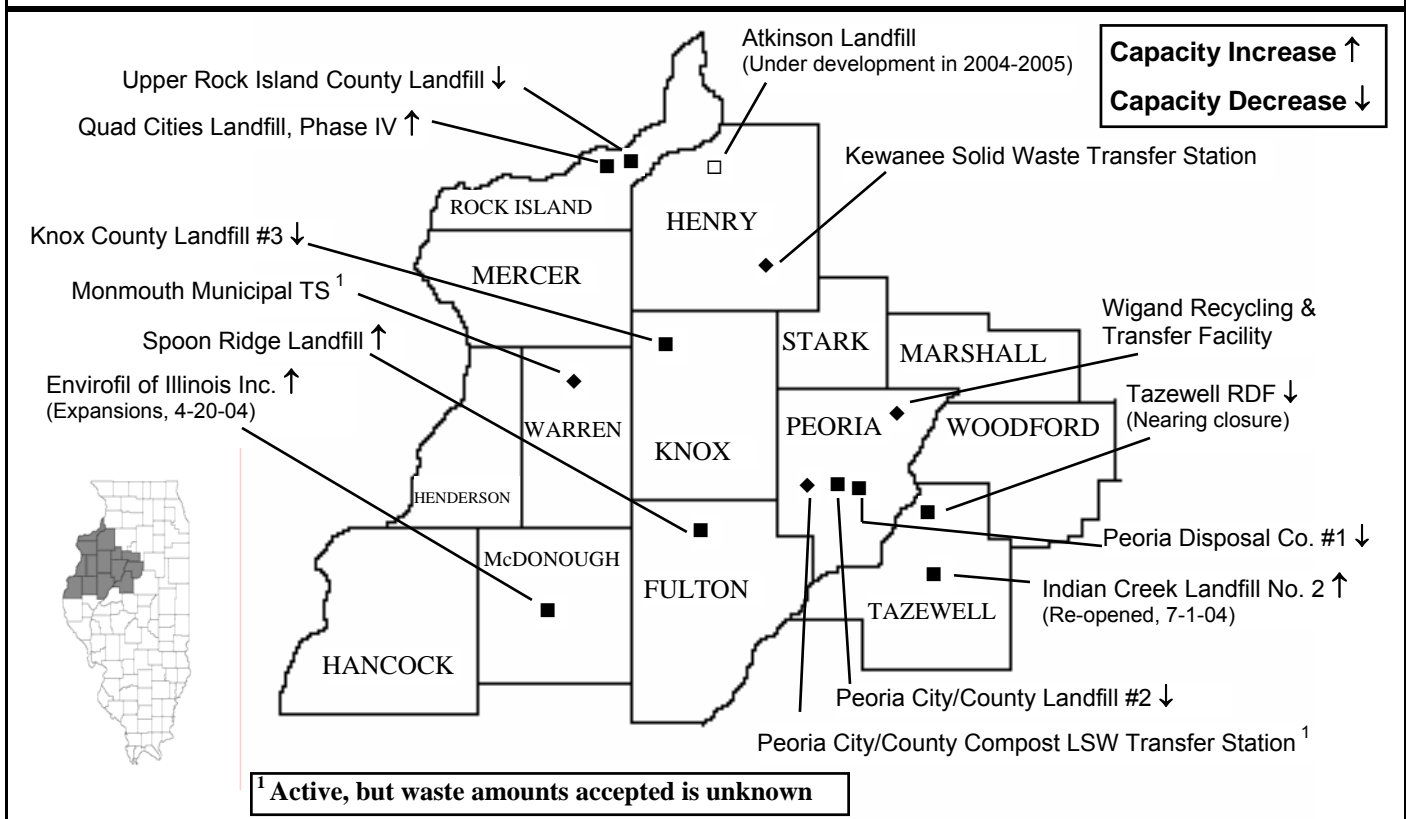

The Region's landfills reported accepting more than 4.3 million gate cubic yards of waste for disposal during 2005.

In Region Three, the amount of waste received in 2005 by nine active landfills was down 1.2 million gate cubic yards from that received a year earlier, less than a one (0.6) percent decline.

No landfill in this region was in the top ten list in terms of large amounts of waste received in the State.

Landfills and Transfer Stations: Active, Closed, Under Development in 2005

*Total remaining capacity (from table below) divided by total waste accepted. Tells how long the region may be served by local landfills at current disposal rates, barring capacity adjustments, until capacity is depleted.

Indian Creek Landfill No. 2 re-opens, as Tazewell RDF nears closure

In Hopedale, Indian Creek Landfill No. 2 received a significant modification to its permit on Nov. 26, 2003 in order to develop Areas 2 and 3. An Illinois EPA permit to open was granted on June 30, 2004. This site had previously been inactive since the early 1990's.

All active landfills in the region expect to remain open into 2006. The operator for Tazewell Recycling and Disposal Facility, East Peoria, has proposed a closure date in 2006. A transfer station is expected to be built at the landfill site. The site was still open in June 2006.

Envirofil of Illinois Inc. and Atkinson Landfill expand

Illinois EPA approved two expansions at Envirofil of Illinois Inc. on Apr. 20, 2004. The site expanded horizontally by 57 acres and by 19 acres vertically, adding 9.25 million cubic yards airspace to its facility.

Atkinson Landfill, Atkinson, also received a significant modification permit on Jan. 16, 2004; including a new liner, waste excavation, a 45.7 acre vertical and a lateral expansion (78.2 ac.). The site is still under construction as of June 2006.

New cells opened in three other landfills in the region at Knox County Landfill #3, Oneida, Quad Cities Landfill, Phase IV, Milan, and Upper Rock Island County Landfill, East Moline, during 2004 and 2006.

Landfills: Waste Accepted 2005; Remaining Capacities Jan. 1, 2006

Total			4,364,835		202,066,000			

* Five landfills accepted out-of-state waste during 2005 totaling 1,321,392 gate cubic yards, or 30.3% of the region's total, from nine other states.

¹ Standing among 51 landfills that accepted waste during 2005.

² Standing among 51 landfills that reported capacity as of Jan. 1, 2006.

³ UD = Under Development as of 1-16-04, a lateral expansion (78.2 ac.) and a vertical expansion (45.7 ac.) are under construction.

⁴ 57 ac. horizontal expansion & 19 ac. vertical expansion approved on 4-20-04, adding 9.25 million cu. yds. airspace.

⁵ Significant modification to permit approved 11-26-03, approved site opening on 6-30-04.

Spoon Ridge Landfill ranks first in capacity since 1997

The Agency granted Spoon Ridge Landfill, near Fairview, a permit in December, 1997, that allowed the facility's owner and operator to expand the disposal area from 80 to 372 acres. The total landfill area changed from 995 to 1,038 acres, and its peak elevation rose from 813.5 to 915 feet. With a design capacity of 84.6 million airspace cubic yards, the facility has been the state's largest landfill for the past eight years, but this year it is last in terms of waste received.

On June 30, 1998, the owners announced a change to temporarily close Spoon Ridge as part of a nationwide effort to cut costs. The landfill owners said, in published reports, they would use the time to continue developing transfer stations and securing waste contracts that will eventually allow waste from the greater Chicago area and southeastern Wisconsin to be transported to Spoon Ridge.

Delegated inspections performed in Tazewell County

The Illinois EPA has delegated inspection authority to Tazewell County Health Department for duties usually performed by the Agency's field office, such as investigating citizen complaints about open dumping and open burning, and for inspecting the county's two active landfills and one compost facility. Tazewell County's program was the first delegation partnership in the State, in place since 1987.

Transfer station operators report 43,180 tons handled

Wigand Recycling and Transfer Facility, Chillicothe, handled 35,083 gate tons of waste, 81 percent of the amount voluntarily reported for the region by two sites. Kewanee's municipally owned and operated transfer station handled more than 8,000 tons of municipal waste. However, two other transfer stations chose not to complete the Agency's voluntary survey.

Questions and Complaints

Illinois EPA Region Three personnel investigate reports of suspected illegal waste disposal, and inspect the Region's landfills, transfer stations and compost facilities, except in **Tazewell County**, where joint responsibility has been delegated to a local authority.

Questions or complaints concerning pollution control facilities, open dumping or other incidents should be directed to the office having jurisdiction over the site:

Total			43,180

¹ Active in 2005, but waste amounts accepted unknown

Municipal Waste Management Plans

The Solid Waste Planning and Recycling Act requires all Illinois counties and the city of Chicago to develop, adopt and implement 20-year municipal waste management plans.

Plans include programs and recommendations to achieve solid waste management goals, which typically include waste reduction, recycling, incineration and landfilling as program options.

The law requires each plan to include a program designed to recycle 15 percent of municipal waste by the end of the third year of the program and 25 percent of municipal waste by the end of the fifth year, depending upon the availability of markets.

Every five years, each plan must identify changes in planning areas, evaluate progress in plan implementation and, if necessary, revise plan recommendations and goals. The county also has the option of updating its solid waste generation rate. The plan is then submitted to the Illinois EPA for review and comment.

Five year plan updates have been adopted by all counties except for Hancock County.

Ten year plan updates have been adopted by Henderson, Henry, Knox, Marshall, Peoria, Rock Island, Stark, Tazewell and Woodford counties.

Hancock, Rock Island and Tazewell counties have completed their 15-year plan updates.

Questions concerning these plans and their availability should be directed to the appropriate local administrators listed in Appendix K of this report.

Details concerning Region Three landfills, transfer stations, and compost facilities follow on pages R3.5 through R3.23.

Almost forty percent of landscape waste receipts handled at Peoria City/County Landfill #1

The Peoria/Quad Cities region's compost facilities processed 21,203 gate tons of landscape wastes during 2005, 17 percent less than in the previous year. About 40 percent of the landscape waste in the region handled in 2005 was managed at the compost facility located at Peoria City/County Landfill #1, ranked fifteenth in the State.

Compost Facilities: Waste Accepted 2005

Total			21,203

County recycling rates average 28.8 percent

The Agency surveys recycling coordinators statewide each year. Four counties did not voluntarily report new data. Recycling rates ranging from 1.9 to 70.2 percent were reported. The regional recycling rate of 28.8 percent is considered to be the average rate for 2005. ♦

Spoon Ridge Landfill*

County	Fulton
Municipality	Fairview
Location	Route 1, Highway 97 North
Location ☎	309-778-2787
Hours of operation	Mon.-Sun.: 24 hours a day
Waste accepted	Municipal, nonhazardous special
Tipping fee	Unknown
Owner	BFI Waste Systems of North America Inc.**
Operator	BFI Waste Systems of North America Inc.**

*The site is operating in a diminished capacity, in response to unfavorable market conditions. Under fully operating conditions, the waste volume could be three million cu. yds. per year. During calendar year 2005, waste was accepted only on 6-10-05. All other days during calendar year 2005 and onward through March 2006, this landfill did not accept any waste. In April - June 2006, waste was again accepted at the landfill, but it was exempt from state solid waste management fees. However, the site did become more active in calendar year 2006.
