

Region Seven: Southern Illinois

Landfills Transfer Stations Compost Facilities

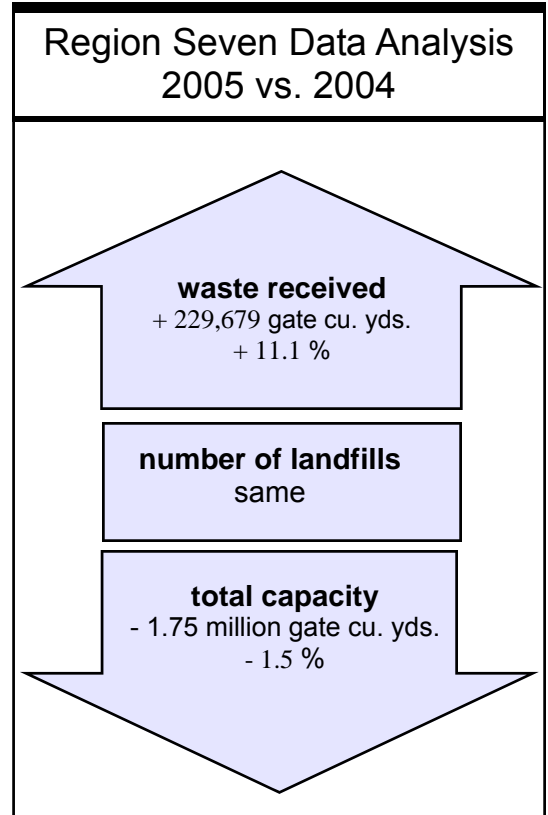

DuQuoin Mayor John Rednour accepted a "Green Communities" award from Illinois EPA recognizing the city's leadership on environmental issues.

REGION SEVEN'S FIVE ACTIVE LANDFILLS ACCEPTED almost 2.3 million gate cubic yards of waste during 2005. This volume was up 11.1 percent, or almost 230,000 gate cubic yards more than 2004's total.

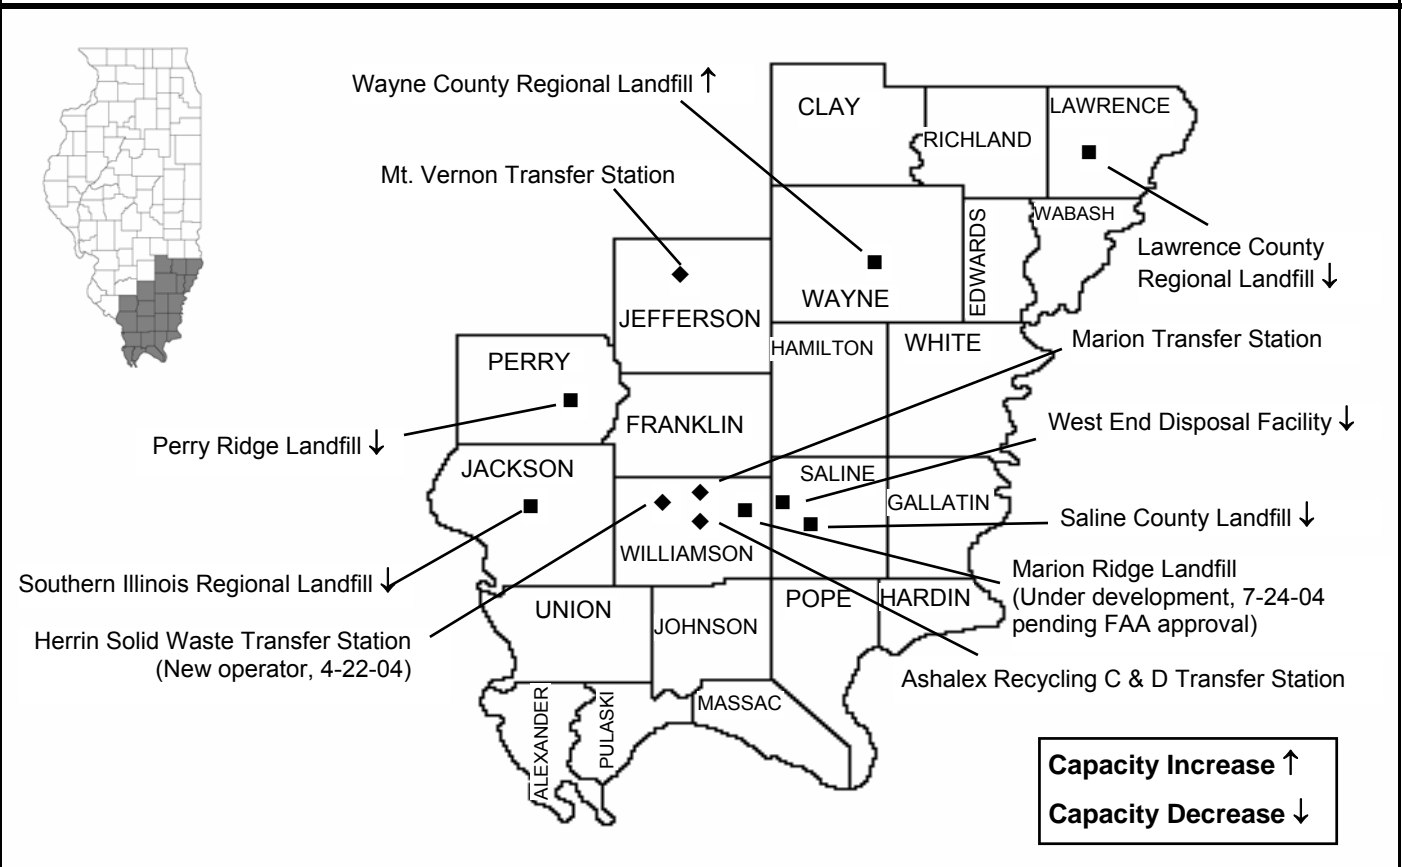

Southern Illinois Regional Landfill, near DeSoto, moved to 10th place in waste disposal ranking of all state landfills in 2005, and accounted for nearly 67 percent of the waste landfilled in the region during the year.

Lawrence County Regional Landfill, Sumner, accepted 66,924 gate cubic yards or 29 percent of its waste in 2005 from Indiana. Of the 1.5 million gate cubic yards of waste received by Southern Illinois Regional Landfill in 2005, 357,815 gate cubic yards, or 23 percent, came from Arkansas, Indiana, Kentucky and Missouri. Tons totaling 24,276 (19 percent of its waste stream) came to Perry Ridge Landfill from Missouri. West End Disposal Facility, Thompsonville, accepted 10,669 gate cubic yards or nine percent of its waste from Kentucky.

The regional percentage of imported waste is 20 percent, considerably less than Region Six (Metropolitan East St. Louis), where out-of-state waste comprised 55.5 percent of total waste landfilled. The state-wide average of imported waste is 13 percent.

Landfills and Transfer Stations: Active, Inactive & Under Development in 2005

* Total remaining capacity (from table below) divided by total waste accepted. Tells how long the region may be served by local landfills at current disposal rates, barring capacity adjustments, until capacity is depleted.

Fifty-one (51) years of capacity life remains

As of Jan. 1, 2006, the region's landfills reported a total capacity of more than 117.8 million gate cubic yards, allowing 51 years of landfill life for the region. Three of the region's landfills: Southern Illinois Regional Landfill, Perry Ridge Landfill and West End Disposal Facility contain 81.1 percent of the capacity available in the region for waste disposal. They rank sixth, tenth, and 11th of all the State's 51 landfills reporting remaining capacity.

The largest of these landfills, Southern Illinois Regional Landfill, has almost 49.9 million cubic yards of capacity available. On July 2, 2004, this landfill's South Unit lateral expansion was approved. The landfill contains 143.3 acres and brought 20.6 million more in-place cubic yards of landfill capacity.

Perry Ridge Landfill opened in DuQuoin on Mar. 8, 2004

Landfill capacity needs in Region Seven are appeased for the time being by the opening of Perry Ridge Landfill, DuQuoin, on March 8, 2004. Perry Ridge Landfill expects to operate for 23 years. This landfill has an initial design capacity of 14.9 million airspace cubic yards. The site consists of Phase 1A (2.9 ac.) and Phase 1A-Southwest (3.2 ac.).

At Saline County Landfill, on Aug. 19, 2004, a 28.9 acre lateral expansion was approved for development, increasing future disposal capacity by 3.1 million cubic yards. The site accepted waste during January 2005 through Feb. 18, 2005, when it ceased accepting waste temporarily. On May 19, 2006, the landfill became active again and continued to be active through June 2006.

New cells opened in 2005 and early 2006 at Southern Illinois Regional Landfill, Wayne County Regional Landfill and West End Disposal Facility.

Landfills: Waste Accepted 2005; Remaining Capacities Jan. 1, 2006

	Municipality	County	Wastes		Capacity		Disp. Area Acres	Close Year

Totals			2,290,601		117,847,000			

* Four landfills accepted out-of-state waste from Arkansas, Indiana, Kentucky and Missouri during 2005, totaling 459,684 gate cubic yards, or 20% of the region's total.

¹ Standing among 51 landfills that accepted waste during 2005.

² Standing among 51 landfills that reported capacity as of Jan. 1, 2006.

³ Permitted to open 12-12-03, began accepting waste on 3-8-04.

⁴ Unit 2's lateral expansion (28.9 acres) adding 3.1 million in-place cu. yds. was approved on 8-19-04.

⁵ South unit lateral expansion (143.3 ac.) approved on 7-2-04 adding 20.6 million in-place cu. yds. capacity.

County agencies inspect facilities; investigate dumping

The Illinois EPA has delegated inspection authority to local governments in Jackson, Perry and Wayne counties. A multiple county delegated partner is Ambraw Valley Solid Waste Agency that inspects Lawrence County Regional Landfill and several closed sites in Crawford, Lawrence and Richland counties.

Delegation agreements authorize these agencies to conduct many of the duties that would otherwise have to be performed by the Illinois EPA's Marion field office: investigating and enforcing suspected violations of land pollution laws and reports of open dumping, and inspecting landfills, transfer stations and compost facilities permitted through the Agency's Bureau of Land. (Inspections also include nonhazardous industrial waste landfills, or monofills, and landfills that closed prior to 2003; none of which are included in this report.)

Transfer station activity is underrepresented

In 2005, four active transfer stations played an important role in an area encompassing 8,421 square miles. All four facilities voluntarily reported to the Agency that they handled 126,222 tons of municipal waste during 2005.

Transfer Stations: Waste Handled 2005			
	Municipality	County	Tons
Herrin Solid Waste	Herrin	Williamson	64,000
Marion Transfer Station	Marion	Williamson	35,754
Mt. Vernon Transfer Station	Mt. Vernon	Jefferson	26,243
Ashalex Recycling C & D TS	Marion	Williamson	225
Total			126,222

Almost 2,000 tons of landscape waste accepted

The region's two compost facilities reported handling 1,999 tons of landscape waste, 45 percent more than the amount accepted in the previous year. An additional 623 tons were accepted in 2005.

Ashalex Recycling Compost Site, Marion, opened on Sept. 1, 2004.

Compost Facility: Waste Accepted 2005			
	Municipality	County	Tons
New Earth	Carterville	Williamson	1,089
Ashalex Recycling Compost ¹	Marion	Williamson	910
Total			1,999

Questions and Complaints

Illinois EPA Region Seven field office personnel investigate reports of suspected illegal waste disposal, and inspect the region's landfills, transfer stations and compost facilities, except in **Crawford, Jackson, Perry, Lawrence, Richland and Wayne counties**, where joint responsibility has been delegated to local authorities.

Questions or complaints concerning pollution control facilities, open dumping or other incidents should be directed to the office having jurisdiction over the site:

Municipal Waste Management Plans

The Solid Waste Planning and Recycling Act requires all Illinois counties and the City of Chicago to develop, adopt and implement 20-year municipal waste management plans.

Plans include programs and recommendations to achieve solid waste management goals, which typically include waste reduction, recycling, incineration and landfilling as program options.

The law requires each plan to include a program designed to recycle 15 percent of municipal waste by the end of the third year of the program and 25 percent of municipal waste by the end of the fifth year, depending upon the availability of markets.

Every five years, each plan must identify changes in planning areas, evaluate progress in plan implementation and, if necessary, revise plan recommendations and goals. The county also has the option of updating its solid waste generation data. The plan is then submitted to the Illinois EPA for review and comment.

Five year plan updates have been adopted by Edwards, Franklin, Gallatin, Hardin, Jackson, Jefferson, Lawrence, Massac, Perry, Pope, Richland, Saline, Union, Wabash, Wayne, and White counties.

Ten year plan updates have been completed by Clay, Edwards, Gallatin, Lawrence, Richland, Saline, Wabash, Wayne and White counties.

Questions concerning these plans and their availability should be directed to the appropriate local administrators listed in Appendix K of this report.

Details concerning Region Seven landfills, transfer stations and compost facilities follow on pages R7.5 through R7.17.

Multiple year recycling rate average is 15.1 percent

Each year, the Agency seeks information regarding recycling and waste generation rates.

Southern Illinois is closer to Indiana and Kentucky recyclable material markets, than to Illinois markets. Rates ranged from 3.4 to a high of 35.0 percent, yielding a multi-year average of 15.1 percent.

Six of 22 counties in the region offered current data, yielding a survey response rate of 27 percent. The rest of the counties had data from 1994-2004, and one had no data at all. ♦
