Notice of Public Hearing

Impaired Waters of Illinois

Draft 2008 Integrated Report

Thursday April 24, 2008 10 a.m.

**Illinois EPA Training Room
1021 North Grand Avenue East
Springfield, Illinois**

The purpose of this hearing is to provide an opportunity for the public to comment on the proposed Draft 2008 Integrated Report. The Illinois EPA is required under Sections 303(d), 305(b) and 314 of the federal Clean Water Act to assess waters of the state and evaluate compliance with applicable water quality standards and designated uses. Waters that are assessed as not achieving those standards are identified in the Integrated Report.

Waters identified in the Integrated Report in accordance with Section 303(d) are deemed impaired for specific chemical constituents and consequently additional loadings (i.e., discharges) of those constituents may be restricted. In addition to possible restrictions on future loadings to these listed waterbodies, waters identified in accordance with Section 303(d) are subject to the development of Total Maximum Daily Loads (TMDLs). TMDLs in Illinois may take the form of a watershed study in which the chemical constituent causing impairment to that waterbody is evaluated. A TMDL is the sum of the allowable amount of a single pollutant that a waterbody can receive from all contributing sources and still meet water quality standards or designated uses.

The Draft 2008 Integrated Report is reviewable at the Illinois EPA's web site at <http://www.epa.state.il.us/water/tmdl/303d-list.html>
