

North Fork Pork Info

To meet Dept. of Ag requirements, you need to:

Soil Test

Take annual manure analyses (at least until stable)

Apply at agronomic rates according to analyses

Obey setbacks

200' from water

200' from wells (NRCS requirement)

¼ mi. from residences IF you have to surface apply

no setback from residences IF injecting

To meet CAFO requirements:

You do NOT need a NPDES permit, UNLESS you discharge

Your facility should be a “no discharge” facility, EXCEPT in the case of a tanker turnover or accident, or drag hose rupture AND that spill reaches a “navigable water” (navigable is yet to be defined)

You DO NOT have a discharge based on land application (i.e. large unexpected rainfall after an application causes a fish kill downstream), IF you have a nutrient management plan, AND you are following it!
