

## **North Fork Pork Info**

**To meet Dept. of Ag requirements, you need to:**

**Soil Test**

**Take annual manure analyses (at least until stable)**

**Apply at agronomic rates according to analyses**

**Obey setbacks**

**200' from water**

**200' from wells (NRCS requirement)**

**¼ mi. from residences IF you have to surface apply**

**no setback from residences IF injecting**

**To meet CAFO requirements:**

**You do NOT need a NPDES permit, UNLESS you discharge**

**Your facility should be a “no discharge” facility, EXCEPT in the case of a tanker turnover or accident, or drag hose rupture AND that spill reaches a “navigable water” (navigable is yet to be defined)**

You DO NOT have a discharge based on land application (i.e. large unexpected rainfall after an application causes a fish kill downstream), IF you have a nutrient management plan, AND you are following it!

## **Producer Signature**
