Larson - Malone's	80	305	0	-27	-60	278	-60	1
Seville - Gayla's - F5	50	65	303	-23	-3	42	300	-42
Fred's - F6, F7 & F8	194	85	398	-27	-60	58	338	-32
TWF4	77	53	295	-27	-60	26	235	-37
TWF1	32.3	40	206	-27	-60	13	146	-39

Change in Soil Test = Crop uptake for 2012-2016 - Nutrients applied to field for 2012-2016 in manure  
 9 lbs P required to change soil test 1 lb  
 4 lbs K required to change soil test 1 lb

Projected levels are based on planned crop rotations and planned manure applications.

All P tests will be reduced with the planned manure applications

Some fields may need additional P & K from commercial fertilizer applications. Those decisions are left to individual landowners, as long as they do not overapply these nutrients in conjunction with the planned manure applications.
