

**Special Conditions****Construction Authorization**

The facility is an 143 acre existing construction limestone quarry designated as the William Charles Construction – Mulford Quarry, located in Sections 33, T44N, R2E of the 3rd P.M. in Winnebago County near Rockford. Pit operations include the drilling, excavation, crushing, screening, and stockpiling of limestone aggregate. The facility also accepts clean recycled concrete material for reuse in construction projects. Surface runoff is directed to quarry ponds. Operations result in the discharge of 0.25 MGD from Outfall 001 to unnamed tributary of Madigan Creek of surface runoff, groundwater seepage, and pit pumpage/dewatering.

Storm Water Pollution Prevention Plan: Authorization is hereby granted to construct treatment works and related equipment that may be required by the Storm Water Pollution Prevention Plan developed pursuant to this permit. Discharging sedimentation ponds are not covered under the Storm Water Pollution Prevention Plan authorization, unless they discharge to a non-coal outfall specifically identified in a construction authorization under this permit.

This Authorization is issued subject to the following condition(s).

- a. If any statement or representation is found to be incorrect, this authorization may be revoked and the permittee thereupon waives all rights thereunder.
- b. Plans and specifications of all treatment equipment being included as a part of the storm water management practice shall be included in the SWPPP.
- c. Any modification of or deviation from the plans and specifications in the initial SWPPP requires amendment of the SWPPP.
- d. Construction activities which result from treatment equipment installation, including clearing, grading and excavation activities which result in the disturbance of land area must meet the conditions of this permit.
