

Special Conditions**Construction Authorization**

The facility is a existing, approximately 85.3 acre limestone mine, designated as VCNA Prairie Aggregates Illinois, Inc. - Fairbury Yard 98, located in Section 19 and 30, Township 27N, Range 6E of the 3rd P.M. in Livingston County, Illinois near Fairbury. Mining operations include the excavation, crushing, screening, washing and stockpiling of limestone aggregate. Surface runoff and processing wash water is directed to the quarry sedimentation pond. Operations result in the average discharge of 0.72 MGD of surface water runoff, process wash water, groundwater seepage, and pit pumpage/dewatering through Outfall 001 to Hickory Creek which is tributary to nearby Vermillion River.

Storm Water Pollution Prevention Plan: Authorization is hereby granted to construct treatment works and related equipment that may be required by the Storm Water Pollution Prevention Plan developed pursuant to this permit. Discharging sedimentation ponds are not covered under the Storm Water Pollution Prevention Plan authorization, unless they discharge to a non-coal outfall specifically identified in a construction authorization under this permit.

This Authorization is issued subject to the following condition(s).

- a. If any statement or representation is found to be incorrect, this authorization may be revoked and the permittee thereupon waives all rights thereunder.
- b. Plans and specifications of all treatment equipment being included as a part of the storm water management practice shall be included in the SWPPP.
- c. Any modification of or deviation from the plans and specifications in the initial SWPPP requires amendment of the SWPPP.
- d. Construction activities which result from treatment equipment installation, including clearing, grading and excavation activities which result in the disturbance of land area must meet the conditions of this permit.
