

Special Conditions**Construction Authorization**

The facility is an existing, approximately 218 acre quarry, designated as William Charles Construction Co. — Irene Quarry located in Section 9, T43N, R3E, 3<sup>rd</sup> P.M., in BooneCounty, Illinois near Belvidere. Approximately 60% of the site is in the process of or has been mined. Mining operations include the blasting, excavation, crushing, screening and stockpiling of limestone aggregate. A portable hot mix asphalt plant is also operated at this facility. Operations result in an average discharge of 2.6 MGD of stormwater and pit pumpage from Outfall 001 to an unnamed tributary to the South Branch of the Kishwaukee River.

Storm Water Pollution Prevention Plan: Authorization is hereby granted to construct treatment works and related equipment that may be required by the Storm Water Pollution Prevention Plan developed pursuant to this permit. Discharging sedimentation ponds are not covered under the Storm Water Pollution Prevention Plan authorization, unless they discharge to a non-coal outfall specifically identified in a construction authorization under this permit.

This Authorization is issued subject to the following condition(s).

- a. If any statement or representation is found to be incorrect, this authorization may be revoked and the permittee thereupon waives all rights thereunder.
- b. Plans and specifications of all treatment equipment being included as a part of the storm water management practice shall be included in the SWPPP.
- c. Any modification of or deviation from the plans and specifications in the initial SWPPP requires amendment of the SWPPP.

- d. Construction- activities which result from treatment equipment installation, including clearing, grading and excavation activities which result in the disturbance of land area must meet the conditions of this permit.
